Generalize place value understanding for multidigit whole numbers.	4.NBT.1 Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. For example, recognize that 700 ÷ 70 = 10 by applying concepts of place value and division.  Note: Grade 4 expectations in this domain are limited to whole numbers less than or equal to 1,000,000.	NY-4.NBT.1 Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right.  e.g., Recognize that 70 × 10 = 700 (and, therefore, 700 ÷ 10 = 70) by applying concepts of place value, multiplication, and division.  Note: Grade 4 expectations are limited to whole numbers less than or equal to 1,000,000.					
	4.NBT.2 Read and write multi-digit whole numbers using base-ten numerals, number names, and expanded form. Compare two multi-digit numbers based on meanings of the digits in each place, using >, =, and < symbols to record the results of comparisons.  Note: Grade 4 expectations in this domain are limited to whole numbers less than or equal to 1,000,000.	NY-4.NBT.2a. Read and write multi-digit whole numbers using baseten numerals, number names, and expanded form.  e.g., 50,327 = 50,000 + 300 + 20 + 7  NY-4.NBT.2b Compare two multi-digit numbers based on meanings of the digits in each place, using >, =, and < symbols to record the results of comparisons.  Note: Grade 4 expectations are limited to whole numbers less than or equal to 1,000,000.					

**4.NBT.3** Use place value understanding to round multidigit whole numbers to any place.

Note: Grade 4 expectations in this domain are limitereiteu48 163.30p14(l)2.9(t)15(e)17.1(6(ed)-8 Tm ()Tj-5.1(ad7-5.1)]TJ 0 TcEMC TcT /P <a)]TJ 0.05(te)8107 Tw 8.04 -0 0 8.04 -
